

● Greenroom

Let AI draft. Keep the decision accountable.

A source-checked copilot for community organizers.

Curated official corpus

Synthetic community replay

No live Discord send

ONE PERSON · 2:07 AM

Asha owns the consequence.

She is the volunteer organizer on duty. An incorporated team needs a decision before the deadline.

Asha · synthetic persona

PARTICIPANT MESSAGE · 2:07 AM

“can companies participate??”

Context: incorporated startup team · deadline approaching

A fluent answer can be mistaken for permission.

Official prose · excerpt

“Startup founders and entrepreneurs”

`eligibility.rules_text`

Structured eligibility

“Students only.
Companies/professional organizations
excluded from participation.”

`eligibility.structured`

A founder and a company are not necessarily the same thing. These excerpts need clarification; they do not establish a ruling for an incorporated team.

One question. One visible chain.

answer or stop

04

→ **Outcome recorded**

auditable receipt

A draft was ready. Greenroom held it.

withheld · unsent

AI DRAFT

Kimi K2.7 (hosted)

Companies/professional organizations excluded from participation.

WITHHELD · UNSENT

OFFICIAL SOURCE A · ELIGIBILITY – RULES PROSE

“Startup founders and entrepreneurs”

eligibility.rules_text

source

OFFICIAL SOURCE B · ELIGIBILITY – STRUCTURED SETTINGS

“Students only. Companies/professional organizations excluded from participation.”

eligibility.structured

source

Actual hosted UI · provider response: kimi-for-coding (existing UI label unchanged)
Issue registered during human corpus review (2026-09-10) · no owner assignment

The draft pauses. The evidence stays visible.

DRAFT	Withheld from the answer returned by the workbench	UNSENT
EVIDENCE	Both official source anchors attached	2 SOURCES
NEXT STEP	Contact route from the September 10 source snapshot	REVIEW NEEDED
AUDIT	faq.conflicted · question and source pair recorded	RECORDED

Asha sees the contact route saved with that snapshot; it is not verified as current. No case is assigned and no notification is sent.

AI stays useful. The gate stays in charge.

01

Build the draft

Retrieve

BM25 selects relevant official material

Draft

a hosted model or labeled offline stand-in

Repair

one retry with check results before escalation

02

Deterministic gates own

Permission

check citations, source anchors, qualifiers, polarity, dates and numbers

Conflict disposition

human-registered high-severity issues require review

Audit

answered, escalated, and conflicted remain distinct outcomes

The same boundary can govern outreach.

OBSERVE	Lifecycle radar flags a stalled participant	SYNTHETIC REPLAY
PROPOSE	Draft a context-specific nudge	DRAFT ONLY
DECIDE	Organizer approves or rejects	HUMAN CLICK
RECORD	sent, simulated, failed, rejected stay separate	NO MERGING

Current boundary

The local sender is simulated. There is no consent/opt-out model, provider idempotency key, live-guild composition, or measured recovery impact yet.

Every claim has a visible boundary.

Implemented locally

Hero chain

question → draft → hold → sources → contact route → audit

Source-bound checks

deterministic checks plus reproducible local workbench evidence

Bounded demo

Official corpus

curated public material, not synthetic

English review video

140 seconds · recorded hosted hero run

Fresh proof + next

Current-source hosted hero

PASS · 1 Kimi request · September 12, 2026
Existing human registry; one scenario

Adoption + impact

need a live organizer pilot; no scale claim

Hosted hero: HTTP 200 · 3918 ms · response model kimi-for-coding. Candidate generation skipped; existing human registry used.
Source 1eddf6d51b37191e · corpus 46803dd9cd17b4ea. The 140-second film uses this recorded run; one scenario is not a full hosted evaluation.

Give the organizer evidence. Leave the decision with them.

The space before Send.

Next validation: broaden hosted checks → organizer walkthrough → consent-aware live-guild pilot
